SCM 125 CO-OP PLACEMENT

## HIGHLIGHTS

- Supply Chain is one of the fastest growing industries in Canada and supply chain management professionals occupy a range of influential positions across companies -procurement, operations, logistics, transportation & trade, consulting, senior management, and more
- Completing the program will transform students into someone with practical business skills and high-demand skills
- Full student support for co-op work placement and career development

## PROGRAM DESCRIPTION

This program provides students with foundational background in supply chain management (SCM). Building upon the students' general baccalaureate academic experience, the program begins with a solid foundation in communications and business. The program then goes on to deliver introductory courses in the 3 main areas of SCM: procurement, operations and logistics; before students embark on their Co-op work term. Throughout the program emphasis is placed on the inter-connective nature of SCM, the use of analytics to inform decision-making, and on acquiring knowledge and skills identified through industry consultation.

## CO-OP

VanWest College's Co-op has a strong system in place and a solid foundation of host company partnerships across various industries; a system that equips students with the adequate knowledge and skills that help them succeed in getting work placement in an English environment. Students receive first-hand experience in how job-hunting works in Canada through various activities that are offered by the Co-op department such as on-campus activities, and information sessions etc. Depending on our student needs, the Co-op department will provide regular counselling and training until students secure their placements. Students will be able to perform multifaceted business functions in occupational areas such as purchasing, operations, logistics and customer and information services, financial support and project coordination.

## COURSE DESCRIPTION

### **BUS 101 Cross-Cultural Communication**

This highly interactive, face-to-face course provides an understanding of the interpersonal communication skills required to develop constructive relationships in the multicultural workplace. This course explores foundational theory. Sources of interpersonal difference and barriers to understanding are examined.

### **BUS 103 Marketing Essentials**

This introductory course examines the application, management, and trends of marketing in the Canadian and global marketplace. Students will explore the primary elements of the Marketing mix (*Product, Price, Promotion, and Place*); how to utilize the elements of the Marketing mix to create value for the customer, and how to satisfy consumer needs.

### **BUS 105 Principles of Management**

This course covers the basic concepts of the management process: planning, organizing, staffing, leading, and controlling. Students will develop an overview of the functional areas of business and an understanding of the complex world in which organizational decisions are made. Emphasis is placed on how functional areas are integrated to achieve goals.

### **BUS 107 Business Correspondence**

This “hands-on” course covers communication theory, aspects of written communication, and introduces students to public speaking. On completion of this course, students will be able to: package thoughts clearly, provide clearer communication of both written and verbal messages, and write error free business-related documents.

### **BUS 109 Workplace Preparation**

This course covers basic skills involved in finding and securing employment. The topics in this course all relate to job search strategies, including creating an effective resume, writing a professional cover letter, practicing interview techniques, networking, using the Internet to job search, and understanding labour services.

### **BUS 114 Introduction to Accounting**

This course will introduce the concepts of accounting within the context of business in a Canadian environment. Students develop the ability to prepare and analyze the financial statements of public corporations. Topics include accounting as an information system; introduction to income measure; the accounting cycle; cash and financial statements.

### **BUS 116 Project Management**

This course will present the essential skills students need to make effective contributions and to have an immediate impact on the completion of projects. Coverage of the latest business developments and challenges acquaint students with issues such as project constraints, stakeholder issues, and the project charter.

### **BUS 123 Macroeconomics**

This course introduces students to the fundamental terminology, concepts and theories of macroeconomics with an emphasis on international dynamics. Course topics include demand, supply, economic growth, inflation, markets and their impacts on international trade and globalization.

### **BUS 130 Excel for Business Analytics**

This course introduces students to Microsoft Excel and its use in business analytics. Taught in our computer lab, the course presents foundational and intermediate level tools used frequently in business. Topics include creating/modifying worksheets, manipulating data using formulas, functions, and Pivot Tables, and displaying information using sorting, charting, and exporting tools. Experiential rather than lecture-based learning will be the focus.

### **SCM 140 Procurement & Supply Management**

This course introduces students to the roles, policies, procedures, organizational structures and management involved in purchasing and supply management. The course will present purchasing activities in the context of organizational profitability and broader sustainability and corporate social responsibility effects. Methods for supplier evaluation, selection and management will also be covered.

### **SCM 150 Operations & Process Management**

This course introduces students to operations issues in supply chain management. Topics include the basics of collaborative planning, forecasting, replenishment, enterprise resource planning models, lean thinking, Six Sigma and other statistical process control techniques.

### **SCM 160 Logistics in Supply Chain Management**

This course introduces students to basic logistical concepts, structures and processes utilized in the distribution and inventory of goods and services. Financial, organizational, managerial, and strategic approaches will be covered. The use of information technologies to increase efficiency and profitability will be introduced.

### **SCM 125 Co-op Placement**

As an integral part of the Supply Chain Management Co-op Diploma, the Co-op is designed not only to provide a period of productive employment in the Canadian workplace, but also enables students to apply classroom theory and skills to that employment. Students will experience real-world business practices and gain new perspectives from their employment. Students will be able to perform multifaceted business functions in occupational areas such as purchasing, operations, logistics and customer and information services, financial support, and project coordination. Students must submit a reflective task assignment after completion of required Co-op hours.
